The District's statutory authorization is derived from its formation by the County of San Bernardino on January 21, 1946, under Section 4700 of the California Health and Safety Code to provide sewer service to the Lake Gregory area. The purpose of the District is to protect public health and water environment through proper collection, treatment, and disposal of domestic and commercial wastewater. From its inception until 2010, the District was administered by the County of San Bernardino under the auspices of the Special Districts Department. In 2010, the Crestline community voted to separate the District from County government and, since that election, the District has operated as an independent local public agency governed by a publicly-elected five-member Board of Directors that is authorized by law to adopt rules and regulations for the provision of sewer service within its jurisdictional boundaries pursuant to California Health and Safety Code Section 4700 et seq., California Health and Safety Code Section 5470 et seq., and California Government Code Section 54300 et seq.
