CALIFORNIA CONTRACTORS LICENSE #683295

Dear Crestline Sanitation District,

It is with sincere gratitude for what my friend Jack Winsten accomplished while he was an active Sanitation Board member that I apply to be appointed to fill the current vacancy on the board. If selected, I would be privileged to serve with the same capabilities and enthusiasm as he possessed.

I've lived and worked on this mountain for 69 years, on and off. I began my schooling in Crestline and graduated from Rim High in 1969. My first job was working for Smitty at Crestline Sanitation, so I have a long history with the department and a fond feeling for it.

I've worked on sewer mainlines and Thibodaux pipelines in the San Moritz and Valley of Enchantment areas. I worked for Mike Callick and Tex Bearden in installing sewer hook-ups and caving-in septic tanks for about 2,000-3,000 services. I also worked on the 24-inch sewer line to Las Flores. I have a history and knowledge of the system and the work the district performs.

Although I currently lack the knowledge of the newest regulations, I am a fast learner and have a lot of background knowledge of how sewer systems function. I do believe I would be an asset to the board and would work to keep costs down and bring the knowledge and efficiency of an independent contractor, who has extensive work history, not only with sewers but a vast knowledge of site work, paving, grading and general engineering, as I have spent my work career as an industrial and general contractor.

I still have mainline equipment in my garage. I also have the manhole bases I used to pour throughout the state.

This may sound like a job resume, but my desire is to help the community and help it move ahead. I think my skills and background would enable me to jump into the position and carry on the work of the sanitation district without a gap in efficiency between now and the end of Jack Winsten's term.

Thank you for your consideration of this application

Mick Hill
