

## OPERATIONS MANAGER - STATUS REPORT

September 14, 2023

### Treatment Plants

The treatment plants continue to meet constituent discharge requirements on a routine basis. There have been no discharge violations due to Equipment Failure.

### Collection System

Crews are continuing with regular operations, daily inspections of District lift stations, issuance of correction notices for repairs on private laterals, and inspections on all repairs. Throughout the month, collection staff inspected waterways and the district effluent outfall line after all rain events.

For September the district hydraulically cleaned 1,115 feet of line and raised 36 manholes in assessment districts 10,11,12.

Regulatory Compliance: District is maintaining a >90% compliance currently through the 2023 calendar year...i.e., < 2 SSO's, RWQCB Plant Discharge Requirements.

### Facilities & Infrastructure PowerPoint presentation

There have been no discharge violations due to Equipment Failure.

### Construction Project Report

PowerPoint Presentation

### Talking Points

- Construction continues on the plant upgrade as scheduled, curbs and asphalt are being installed. Training for Operators on lubrication maintenance operations of the new Primary Clarifier have been initiated by the Manufacturer.
- In an effort to assist Operators through the Exam process as well as increase my understanding of the subject, I've started an Operator Math Training program. After each morning meeting I go through any math problems they have been having issues with as well as introduce new math concepts and formulas of an appropriate level for their respective grade. The results have been overwhelmingly positive, I've found I enjoy instruction. as well as the operators getting the help they need in preparation for their certification exams. I am hoping moving forward that this mentoring program of senior operators taking more active approach in helping with training will improve moral as well as move the district in the direction we want to be with regard to proper Operator training and succession planning.
