

# CRESTLINE SANITATION DISTRICT

## MEMORANDUM

**DATE:** 09/14/2023

**TO:** BOARD OF DIRECTORS  
Crestline Sanitation District

**FROM:** DAWN GRANHTAM  
Assistant General Manager

**SUBJECT:** Cleghorn WWTP Belt Press Muffin Monster

**A. RECOMMENDATION**

I recommend to renew the Muffin Monster at Cleghorn WWTP.

**B REASON FOR RECOMMENDATION**

The Grinder is an essential part of the preliminary treatment. The degradation of the grinders cutting teeth has caused the clogging of our return pump as rags and plastics have been making their way through our system. This can cause damage to the pump and motor as well as the valve system. Also, when the return pump clogs it causes issues with our ability to reach our discharge requirements. These are all reasons it's imperative to replace the damaged "Muffin Monster" so we can re-establish pretreatment at our facility and avoid costly pump replacement or repair that will eventually occur if unaddressed.

**C. OTHER INFORMATION**

The Muffin Monster has been in place since 2007 and never rebuilt. It will have a custom cutter stack for grime and grit, Cleghorn WWTP does not have a grit chamber.

**D. FISCAL INFORMATION**

The Sector Superintendent at CA State Parks has given permission to proceed. This will be billed to CA State Parks.

The quote from JWC Environmental is \$10,514.00

The 2023-24 CIP Budget for this rebuild is \$15,000

Good afternoon,

It has come to our attention that much needed repairs are required for the Muffin Monster at the treatment plant. Due to the cost I wanted to send you the quote in case you need to get it approved. If approved before 09/14/2023 it will then go to our Board and then the estimated time it will start would be 8-10 weeks after approval. I have attached the quote. For more clarity, this is the explanation from our Operations Manager....

*Hello Dawn, I wanted to take a moment to speak in regards to the "Muffin Monster" Grinder at our Cleghorn WWTP. The State Parks plant may be one of our smaller treatment plants, but despite the size takes quite a load over the parks busy summer season. We can't, for fiscal reasons, staff the plant 24 hours a day and as such the plant takes lift stations pumping over wastes as well as loads from the tanker drivers pumping the outlying restrooms at the park. The Grinder in question is an essential part of our preliminary treatment. Its job is to grind and or pulverize anything solid that makes its way into the system whether by accident or irresponsible flushing of solid or hard objects. The degradation of the grinders cutting teeth has caused the clogging of our return pump as rags and plastics have been making their way through our system. This can cause damage to the pump and motor as well as the valve system. Also, when the return pump clogs it causes issues with our ability to reach our discharge requirements. These are all reasons it's imperative to repair or replace the damaged "Muffin Monster" so we can re-establish pretreatment at our facility and avoid costly pump replacement or repair that will eventually occur if unaddressed.*

Also, the pump project is almost complete and will be invoiced as soon as I get word that everything is completed.

Thank you,

--
