

OPERATIONS MANAGER - STATUS REPORT

November 9th, 2023

Treatment Plants

The treatment plants continue to meet constituent discharge requirements on a routine basis. The District was issued a NOV due to the Spill on March 15th.

Collection System

Crews are continuing with regular operations, daily inspections of District lift stations, issuance of correction notices for repairs on private laterals, and inspections on all repairs. Throughout the month, collection staff inspected waterways and the district effluent outfall line after all rain events.

For October the district hydraulically cleaned 4,856 feet of line and televised 2,633 ft. of line.

Smoke testing was performed in AD's 11&12, for a distance of 28,337 ft. of CSD sewer and 18,760 ft. of building sewer for a total of 47,587 ft. tested.

Regulatory Compliance: District is maintaining a >90% compliance currently through the 2023 calendar year...i.e., < 2 SSO's, RWQCB Plant Discharge Requirements.

Facilities & Infrastructure PowerPoint presentation

There have been no discharge violations due to equipment failure

Talking Points (this is for anything you want to discuss about the plants or crews)

- Construction continues on the plant upgrade as scheduled. All project areas at the H.C. plant have been covered in asphalt as per the contract, as well as the areas that we added to tie in the new work areas with the existing asphalt.
- I conducted a simulated Spill Response Drill to ensure that all Operations staff is aware of the proper spill response procedures. I wanted to make sure they have the appropriate training during a time that isn't an emergency so that mistakes, if made, can be addressed and corrected before an actual event occurs.
- The pipe for the Sand Bed emergency overflow drain and bypass project have been ordered and we plan to start construction on that in the middle of November.
- The Construction crews are starting to break down and de mobilize as the work on the project is nearing completion several of the storage containers that held tools and equipment have been removed and a small crew remains to finish up the remaining projects.
